Capgemini

Curriculum Vitae

Mahendra Girase
GGID: 30089056

Personal Details

Name	Mahendra Girase
Designation	Analyst / Software Engineer
Birth Date	02/04/2004
Nationality	Indian
Marital Status	Single
Gender	Male
Passport Details	NA
Country	India

Profile:

Driven and adaptable software engineer aiming for a challenging role where I can utilize my technical expertise in backend development, integration technologies, and AI to support organizational goals. Dedicated to continuous learning, problem-solving, and contributing effectively to team success.

Designation	Analyst A4
BU	PBS
DOJ	26*th* June 2025
Service Line	SAP PBS

Competencies:

Programming Languages:	Java, JavaScript, Python, C, SQL, ABAP
Backend & Integration Technologies:	Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring AI, SAP CPI, SAP PI/PO, SAP ABAP, Groovy Scripting, Microservices
Database	MySQL, PostgreSQL, MongoDB
Frameworks & Libraries	Spring Framework, Hibernate, React, Node.js, Express.js
Tools & Platforms:	Git, GitHub, Maven, Postman, Docker, Cloud Deployment
AI/ML Technologies:	Generative AI (LLMs), Agentic AI, AI-enabled service integrations, Machine Learning, Deep Learning
Operating Systems:	Windows 10/11, Linux

Capgemini

Curriculum Vitae

Experience

Start Date: 06/2025
End Date: 08/2025

Project	SAP CPI Training
Role	Analyst
Technology used in project	SAP CPI
Description	During my training, I gained hands-on experience in **SAP ABAP, Groovy scripting, SAP PI/PO**, and **SAP Cloud Platform Integration (CPI)**. I started with **Groovy and ABAP**, where I practiced coding extensively. In ABAP, I learned how to work with database tables—accessing, reading, and modifying data as needed. I also developed selection screens and understood the fundamentals of modular programming. Next, I explored **SAP PI/PO**, where I implemented several integration scenarios such as **File-to-File, File-to-FCC,** and vice versa. I also worked on **dynamic file naming** and understood the configuration of communication channels and adapters. Finally, I trained in **SAP CPI**, where I learned to navigate the **BTP Cockpit**, use the **Integration Suite**, and design end-to-end iFlows. I completed four project scenarios involving various adapters like **SOAP, Mail, HTTP, JMS, SFTP,** and **FTP**. These projects helped me understand the integration lifecycle, error handling, and the use of splitters, routers, and content modifiers.

Start Date: 12/2025
End Date: 03/2026

Project Name:	Java Spring Training
Technology used in project	Spring Framework, Spring Boot
Description	**Backend Learning Experience** • Strong foundation in **Advanced Java**: OOP, Collections, Multithreading, Exception Handling, JDBC, and Design Patterns. • Built REST APIs using **Spring Boot**, Spring MVC, and Spring Data JPA. • Hands-on experience with **Hibernate/JPA** for CRUD, ORM, entity mapping, lazy loading, and transaction handling. • Implemented **Spring Security + JWT** for secure authentication and authorization. • Practiced **Spring AOP** for logging, auditing, and cross-cutting concerns. • Learned **Microservices** concepts: service decomposition, inter-service communication, API

	Gateway basics, and distributed logging. • Worked with **Docker** for containerizing Spring Boot apps and cloud deployment basics. • Used **Maven** for dependency management and **Git** for professional version control workflows.

	Projects
	• **Job Portal Application**
	  ○ Implemented CRUD operations, user roles, secure login/signup, and JWT-based authentication.
	  ○ Built modular services using Spring Boot, JPA, and Spring Security.
	• **AI-Powered E-Commerce Application**
	  ○ Integrated **Spring AI** for generating product descriptions and AI-based product images.
	  ○ Developed product, cart, order, and user modules with secure, token-based API access.
	  ○ Containerized and deployed using Docker.
	• **Event Ticket Management System**
	  ○ Built RESTful APIs using **Spring Boot and Spring MVC** for event and ticket management.
	  ○ Implemented **layered architecture**, DTO mapping, and centralized exception handling in a Java backend service.
	  ○ Designed persistent domain models using **JPA/Hibernate** with Spring Data repositories

Start Date: 03/2026
End Date: 04/2026

Project	Agentic AI Engineering Project – Autonomous AI Agents
Role	Analyst
Technology used in project	Python, OpenAI API, CrewAI, LangGraph, LLM Function Calling, Tool APIs, Git, Prompt Engineering
Description	Worked on an industry-grade **Agentic AI Engineering project** implementing autonomous and collaborative AI agents using **OpenAI, CrewAI, and LangGraph**. Designed stateful agent workflows, multi-agent collaboration patterns, and tool-augmented reasoning systems aligned with real-world AI automation use cases.

Curriculum Vitae

Training/Certification

Trainings	SAP CPI And Java Spring Boot
Certification	➢ EF Solo Certification ➢ Effective Leadership ➢ Generative AI ➢ SAP CPI for beginners with hands on ➢ Java Spring Framework, Spring Boot, Spring AI - Gen AI

Education

Degree	Institution	Year	CGPA/Percentage
B.Tech	Vivekanand Education Society Institute of Technology, Mumbai	2021-2025	9.28 CGPA
HSC	RDMP Jr College of Science, Dondaicha, Dhule, Maharashtra	2019-2021	89 %
SSC	Sunrise Vidyalaya, Surat, Gujarat	2018-2019	67.33 %
